### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard A. Steinberg, Reg. No. 26,588, on 25 June 2003.

The application has been amended as follows:

In claim 1, third from last line, please change "fluorophone" to --fluorophore--.

2. The following is an examiner's statement of reasons for allowance: The claims are allowable over the teachings of Cunningham et al., (US Patent 5,506,107), the closest prior art. Cunningham et al., disclose a method to detect the ability of variants of hGH to bind to hGHbp where the detection is achieved through the use of fluorophore (fluorescein-labeled hGHbp). Cunningham et al., rely upon the fluorescence of the labeled hGH binding protein and the resulting shift in fluorescence and the presentation of homoquenching of the hGHbp as a result of the binding of the hGH, be it wild type or variants. Cunningham et al., do not teach detecting the presence of such variants through fluorescence of the variant. Accordingly, the prior art of record does not teach or reasonably suggest the claimed method.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
